

Medpark

A1 Alllogroeft

# A1 Allograft

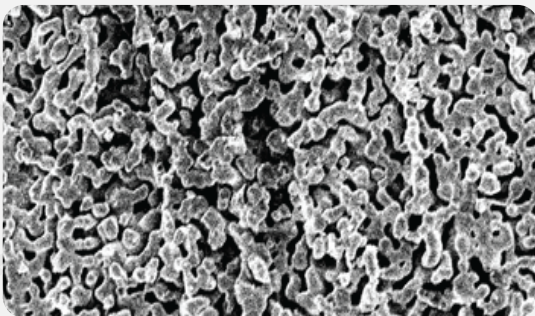

## NEW, INNOVATIVE ALLOGRAFT

### Features

- 1. Safety**
  - Safe against immune reactions
  - Safe from viral disease infections and secondary infection

- 2. Remarkable Bone formation and regeneration**

- 1) Macropore structure: Vascular permeability
- 2) Micropore structure: Cell transferable
- 3) Nanopore structure: Improving osteoinduction and osteoconduction by inducing cells and growth factors

◀ Observing the surface of A1 in high magnification (x2000): Various porous structure of macro, micro and nano pores interconnected in three-dimension can be identified.

### Specification

Code	Type	Particle Size	Volume(cc)
AI-030	Powder	0.2~1.0mm	0.3cc
AI-060			0.6cc
